

UVC EMITTER HOOD

REYCO Systems® can custom design UVC hoods using Steril-Aire shatter resistant, plastic sheathed UVC Emitters™ for specific applications. The UVC light kills virus, bacteria, mold, fungus, and yeast through the disruption of the DNA or RNA structure at the cellular level. This means that UVC light will effectively destroy Coliform, Salmonella, E.coli, Staphylococcus, Listeria, and Anthrax on the surface of your products prior to packaging.

- Heavy duty stainless steel or aluminum construction, water tight electrical for wash down duty.
- Variable combination of UVC bulbs can accommodate conveyors up to a 6 foot width.
- Easily opens for cleaning, bulb replacement and conveyer access.

- Placed either over or under line for maximum UVC exposure.
- Custom Conveyor system design available to roll, turn, or agitate product.
- Engineered for your specific application.

- Can be vertically or horizontally aligned with single or multiple light assemblies.
- Food contact surface decontamination such as conveyors and shakers.
- For use with; frozen products, fresh products, ready to eat products, products prior to bulk storage.
